Summary

Innovative and performance-driven **Front-End Developer** with 5+ years of experience delivering scalable, user-centric web applications. Adept at leveraging **ReactJS**, **TailwindCSS**, and modern development frameworks to enhance user experiences and optimize application performance. Experienced in collaborating with cross-functional teams to design and implement responsive, high-performing, and interactive solutions. Passionate about developing elegant solutions for complex problems with proven success in managing multiple projects simultaneously.

Technical Skills

Programming Languages: JavaScript (ES6+), HTML5, CSS3, SCSS, TailwindCSS
Frameworks & Libraries: ReactJS, Node.js, Express, jQuery, Bootstrap, MERN Stack (MongoDB, Express, React, Node.js)
Databases: MongoDB, PostgreSQL, MySQL, Mongoose, Sequelize, GraphQL
Tools & Platforms: Git, Chrome DevTools, Agile Methodologies

Professional Experience

Front-End Developer

Freelancer | Remote | Apr 2020 – Dec 2023

- Delivered an interactive **soccer application** by developing modular components with **ReactJS** and **JavaScript**, improving load times by 20% through code optimization.

- Enhanced user engagement by implementing responsive design with **Bootstrap** and media queries, achieving a 95% user satisfaction rating.

- Debugged and optimized features using **Chrome DevTools**, resolving performance bottlenecks within tight deadlines.

- Collaborated with design teams and stakeholders, utilizing **Git** for version control, to translate creative vision into functional UI.

Front-End Developer

BaseHealth | Sunnyvale, CA | Jun 2018 – Mar 2020

- Spearheaded the development of responsive web applications with **ReactJS** and **TailwindCSS**, reducing CSS maintenance time by 30% through reusable components.

- Increased app load efficiency by 25% using performance enhancement techniques like **code splitting** and **lazy loading**.

- Worked closely with UX designers to implement **custom themes** and **responsive UI designs** using Tailwind's theme customization.

- Improved state management efficiency by implementing **React hooks** and **Context API**, streamlining application workflows.

- Conducted thorough testing for cross-browser compatibility and ensured seamless functionality across devices.

Full-Stack Developer

Clear Lab Inc. | Menlo Park, CA | May 2017 – May 2018

- Built dynamic and scalable web applications by writing clean, modular code using **HTML**, **CSS**, **JavaScript**, and **Python**.

- Enhanced backend processes with **JavaScript** and **Python**, integrating robust site navigation and data handling pipelines.

- Partnered with backend engineers and QA teams in an **Agile environment**, achieving consistent on-time project delivery.

- Applied version control best practices using **Git**, ensuring code integrity and traceability across all development phases.

Education

UC Berkeley Extension | Berkeley, CA
Berkeley Coding Boot Camp | Full-Stack Development | Mar 2024 – Jun 2024

University of Saskatchewan | Saskatoon, Canada
General Engineering Courses | Jan 2012 – Apr 2015
